MONGOOSE 6" COLOUR MIRROR LCD MONITOR

Model number: **LCD600P**

- Remote window
- Adjust +
- Menu
- Adjust -
- Video select V1/V2
- Power

Thank you for purchasing this dual input LCD colour mirror monitor which is suitable for connection to reversing cameras, and to DVD players or another video source.

This LCD mirror monitor is designed to clip over your existing rear view mirror. The bottom attachments are spring loaded so attachment is secure and offers adjustment for different sized mirrors.

Please note that reflections, glare and sunlight may affect the monitor and mirror performance in some situations.

When connected to a reversing camera, the colour monitor will switch on automatically when reverse gear is selected – even if the monitors power switch is in the off position.

If the monitor receives no video input when switched on, a blue screen will appear. To avoid distraction whilst driving press the power switch to 'off'.

Adjustment:

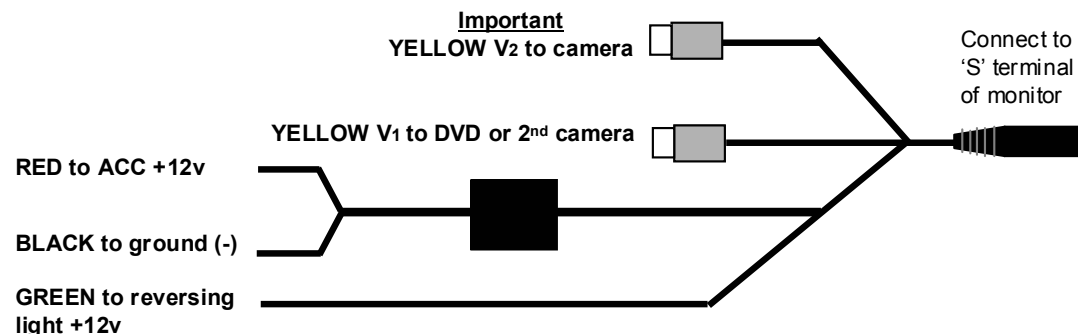

By cycling through the 'menu', you can select;

Picture control: BRIGHTNESS – CONTRAST – COLOUR – TINT - RESET

Image control: UP/DOWN (inverts image) – MIRROR – (reverses image)

Use the '+' '-' keys to make changes

WIRING INFORMATION

- Recommended for professional installation
- Do not disassemble or attempt to repair this product
- Avoid dropping or causing impact as damage may result
- Do not use in extremes of heat and cold
- Avoid placing in a vehicle in direct sunlight as damage may occur and picture quality / vision may be impaired
- Do not exceed rated voltage
- Do not touch or apply pressure to the screen area
- Do not use abrasives or chemicals to clean this product

CAUTION:

When using with a reversing camera, do not drive by watching the screen – it is only intended to show what may be behind your vehicle.

Reversing camera systems are an aid to reversing to indicate what may be behind you.
