

Alarm features

Two **automatic** immobilisers & optional third*

Starter motor and ignition system or fuel pump immobiliser cuts are made so the car cannot be started unless it is disarmed via the remote. The system will immobilise 30 seconds after the ignition is turned off or when the alarm is armed.

Intelligent glass break sensor

It will only trigger the alarm if the shock sensor also picks up an impact. This reduces false alarms.

Intelligent two-stage adjustable shock sensor

It can distinguish between environmental shocks such as trucks or aircraft & a thief attempting to break in. It will auto adjust its sensitivity for the environment on arming. (It can also be adjusted via remote programming.)

Central door locking from the remote*

The doors will lock/unlock when the alarm is armed/disarmed.

Dual tone **battery back-up** siren

Has its own battery & charging system so it will continue to sound if power is cut to it.

Hyper blue status LED

2 x four button rolling code remotes with built-in LED torch

Door, bonnet & boot protection

If the alarm is armed & a door, bonnet or boot is opened the alarm will sound.

PIN code override/emergency disarm via the ignition (63,000 possible codes)

Three year warranty

Programmable features

- ➔ Silent arm/disarm by remote or programmable
- ➔ Passive arming
- ➔ Door ajar warning
- ➔ Automatic re-arm/re-lock*
- ➔ Electronic boot release via the remote*
- ➔ Door lock if alarm triggered*
- ➔ Door lock on brake*
- ➔ Valet mode
- ➔ Perimeter night light on disarm
- ➔ Remote panic/car finder function

* Some cars require additional parts

NOTE: The AVS 9000 is not Star Rated. If a Star Rated alarm is required use the AVS S-Series systems or AVS A4 with the SMS Upgrade module.

SMS features overleaf

TWO-WAY SMS COMMUNICATION

- ◉ Sends an SMS on alarm trigger to up to **five** mobile numbers
- ◉ **Programmable to call one mobile number on alarm trigger** - if the network is overloaded SMS are held back to allow phone calls to get through so this ensures an alarm trigger SMS is received
- ◉ **Alarm trigger SMS includes triggered zone** i.e. door, shock, glass
- ◉ The **car can be immobilised via SMS** in the event that it is stolen
- ◉ **Lock/unlock and arm/disarm** the car via SMS
- ◉ **Status SMS including alarm state, car battery level & cellular coverage**
- ◉ **Secure operation via a PIN code**
- ◉ **Confirmation SMS to all commands**
- ◉ **Panic SMS**
- ◉ **Uses a Sony Ericsson data modem** which is ultra reliable – many cheaper GSM products use inferior modems or even modified cell phones
- ◉ The alarm can be **programmed remotely** by the installer or customer
- ◉ Has **three SMS controlled outputs** - use to turn on extra sirens, lights, cut fuel etc
- ◉ Proven track record & three year warranty

Compatible with the AVS OEM Enhancement module so the alarm can be controlled via a car's factory remote.

Compatible with **wireless sensors**:

- ◉ Wireless **PIRs** - for the rear of vans or trucks
- ◉ Wireless **reed switches** - for ute canopies

Features include:

- ◉ Up to five wireless devices can be learnt
- ◉ SMS notification on detect or tamper for each zone/device
- ◉ 'Supervision' test every 24-hours
- ◉ Low battery notification via SMS
- ◉ Installer 'walk test' mode
