

NEW generation – AVS A4 car alarm. & immobiliser New Zealand's best 4 Star car alarm & immobiliser

The AVS A4 is a well priced Four Star alarm providing more security for the dollar. Plus with the new generation release April 2009 you can operate the alarm from your car's factory key and more.

Alarm features:

Two automatic immobilisers

Starter motor and ignition system or fuel pump immobiliser cuts are made so the car cannot be started unless it is disarmed via the remote. The system will immobilise 40 seconds after the ignition is turned off or when the alarm is armed.

Data battery back-up siren

A self powered siren that communicates independently with the alarm so it cannot be fooled into turning off like normal battery back-up sirens.

Turbo timer functions*

The AVS A4 is designed specifically to work with turbo vehicles. It has two turbo timer options to choose from.

On-board turbo timer – no need to fit an external unit - using the on-board turbo timer is the most secure way to have a turbo timer. The alarm is armed as usual but the car will continue to run for the preset run time of 1, 2 or 4 minutes. If the alarm is triggered during this time the car will shut down and the alarm will sound. It can also be turned off prior to the preset run time via the remote.

Turbo timer interface - link the alarm up with your existing external turbo timer so your car will continue to run on the external turbo timer after the alarm is armed as usual. If the alarm is triggered during this time the car will shut down and the alarm will sound.

Door, bonnet and boot protection

If the alarm is armed and a door, bonnet or boot is opened the alarm will sound.

NEW Control the alarm with your vehicle's factory key*

If your vehicle has a factory key that locks/unlocks the doors your AVS alarm may be

able to interface with it so the alarm arms/disarms at the same time. Boot release will also work from the factory key (and if the alarm is armed it will disarm). This feature will work with most factory keys.

NEW Courier function*

Courier function allows the engine to continue running indefinitely while the system is armed. If the alarm is triggered during this time the car will shut down and the alarm will sound.

Central locking from the remote*

The alarm will lock/unlock the doors when the alarm is armed/disarmed.

Two rolling code waterproof remotes

Hyper blue LED warning light

Compatible with all AVS accessories and sensors

Three year warranty

Control other devices with your AVS remote*

With the addition of the AVS RXPRO receiver your AVS alarm may be able to open/close your garage door or arm/disarm your house alarm. The module can control many other common remote control devices. Talk with us or your AVS installer for more information.

And for additional security add your choice of sensor:

(additional charges will apply):

- ☑ **Shock sensor** - triggers the alarm if an impact is detected to the vehicle.
- ☑ **Glass break sensor** - triggers the alarm if the sound of breaking glass is detected.
- ☑ **Ultrasonic sensor** - triggers the alarm if a change of air pressure or movement is detected in the cabin of the car.
- ☑ **Microwave sensor** - triggers the alarm if body mass movement is detected inside the car (for convertibles).

Certified to AS/NZS 4601.1999 Rev A

*Some cars require additional parts or installation charges.

Programmable features

The following features are programmable options on the alarms.

Feature	S5	S4	S3	A4	9000	3010
Auto arming once the ignition is switched off (will not lock the doors)						<input checked="" type="checkbox"/>
Automatic re-arm/re-lock if the alarm is disarmed but no door is opened*	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Control two vehicles via one AVS remote	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
Door ajar warning upon arming					<input checked="" type="checkbox"/>	
Door, bonnet or boot ajar warning upon arming	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>
Door lock if alarm triggered*					<input checked="" type="checkbox"/>	
Door lock on brake*						<input checked="" type="checkbox"/>
Door lock on ignition*	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>	
Electronic boot release via the remote*	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Factory remote interface (use your existing car remote to operate the alarm)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
Headlights turn on for a set period on arming*	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
Interior light illumination on disarm	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
PIN code override for emergency disarm	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	SMS	<input checked="" type="checkbox"/>
Past alarm trigger memory	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
