Pioneer AVH-P3250BT Double Din DVD/USB/CD Audio Visual Tuner with 5.8 inch Touch Screen and Bluetooth with external mic

Stepping up from the AVH-P3250DVD with integrated Parrot Bluetooth, the AVH-P3250BT is the perfect in-dash control centre capable of handling your mobile phone calls, playing back all your favourite music and films. Look no further than the AVH-P3250BT.

These days we can't resist using our mobile phones in the car. With an integrated Parrot Bluetooth module, the AVH-P3250BT provides you with a safe and legal option for making and receiving calls wirelessly. Hear crystal clear conversation through your car speakers, while your voice is broadcast via the high quality external microphone (which is included).

Enjoy your music and film collection, in almost every commercially available format, including DivX video and DVD. With a convenient USB and auxiliary input on the front panel, you can easily connect your iPod, iPhone and a variety of other devices for AV playback. In addition to this, an SD card input is located on the front panel, acting as portable Hard Disc Drive for your music.

Perfect for those long road trips with the family, the Dual Zone function adds flexibility, enabling front seat passengers to listen to music from one source, for example, whilst rear-seat passengers watch a movie from another source on optional rear screens.

The anti-glare 5.8-inch TFT touch screen gives you quick and easy access to the functions you need. Personalise the main menu items, background image and button illumination (from a choice of 113 colours) to perfectly match your interior or mood.

Whichever audio format you play, you can be assured of high quality, pure audio, customised to your needs. The AVH-P3250BT has an 8-band graphic equaliser which you can use to best match the equalisation levels to the acoustics of your car.

Pioneer

Product Specifications

The system features an easily customisable 'Sonic Centre Control' and Auto EQ, which lets you perfectly calibrate and align the audio signal to the listening position (with an optional microphone).

The AVH-P3250BT also has 3 RCA pre-outs, so you can boost your in-car set-up with additional amplifiers, subwoofers and speakers. .

A better hands-free solution

- Maintain a safe in-car connection with your mobile phone. As the Government crack down on illegal use of mobile phones in vehicles, the AVH-P3250BT ensures you avoid the \$80 fines and loss of 20 demerit points courtesy of built-in Bluetooth.
- Parrot technology also gives you auto Phone book synchronization between your handset and the AVH-P3250BT. You don't even need to stop the music to make a call. You can access a phonebook without switching from the sound source to Bluetooth mode.
- Make and receive calls without physically having to adjust the volume of your music. The mobile phone mute feature automatically reduces the volume of your system when an incoming call is detected or you dial an outgoing call on a cellular phone installed in your car.

Direct Connection & Playback for iPod® and iPhones

- The AVH-P3250BT is designed as the most dynamic solution to connect and improve playback performance for an iPod and iPhone. With iPod Direct Control, consumers can connect their iPod/iPhone straight to the units dedicated iPod/iPhone cable.
- Once connected, the AVH-P3250DVD gives you direct control of the iPod/iPhone audio and video menus, functions and selections via on screen touch panel. This makes song access quick and search extra quick and easy. As a handy extra, the iPod/iPhone will charge while connected.
- Want to control the types of music you listen to in shuffle mode on your iPod? With Pioneer's Link Play button you can. Just plug your iPod directly into the unit using the optional cable, touch the Link Play button and select specific artists, albums, genres. Its that simple.

SD Card Playback

- Take your entire music collection on the road using just one SD card. With an SD card slot hidden behind the front panel, the AVH-P3250BT will playback DivX, MP3, WMA, WAV and AAC files from a SD card.
- Filled with your favourite tunes, the SD card becomes your musical HDD when inserted into the AVH-P3250BT. Unlike most products with a HDD, the SD card can be removed at any time.

Pioneer

Product Specifications

Front Aux-In Connection

- The music connectivity extends beyond USB. Hook up your portable digital devices with ease. Each new Pioneer head unit has a built-in AUX input on the front panel so you can connect your iPod, MP3 player and other portable music devices.

Advanced Sound Retriever

- Hear the glory of original sound across a deeper, wider spectrum from highly compressed MP3 and WMA files stored on a USB memory device. By compensating for data (especially higher frequencies) that tend to get lost in the digital compression process, Pioneer's Advanced Sound Retriever technology enhances audio reproduction nearly all the way up to 20kHz frequencies.

Built in 50W x 4 Channel High-Power MOSFET Amplifier

- To minimize voltage loss in its head unit amplifiers, Pioneer built-in high-performance Power MOSFET integrated circuitry into all its head units. The MOSFET amplifier processes signals more efficiently at 50W x 4 maximum total output. This reduces distortion to virtually nothing at high frequency ranges giving you great clear sound.

Picture Quality Adjustment

- In addition to LED-back light for brighter pictures, the Black Level Adjustment allows the unit to display deeper blacks that you'll appreciate when viewing movies. Colour Temperature Adjustment allows you to fine-tune colour quality ensuring a crisper, clearer picture.

Customisable Wallpapers

- Choose from 4 types of BGP (Background Pictures) and 3 types of BGV (Background Visuals). Or customise your unit by setting your favourite JPEG file as your wallpaper. Parked with no place to go? Now you can enjoy a slide show of your photos on a CD or USB device.

AUX-In Mini Jack Connection for Audio and Video

- Pioneer's AV head units' AUX-in mini jacks extend playback from external iPod® Audio, iPod® Video, MP4 player, digital camera and other portable digital audio/video playback devices. These jacks are built into the front panel for fast, trouble-free connection.

Pioneer

Product Specifications

DivX® Playback

- DivX® is the world's most popular high-compression digital video format and does not appreciably compromise movie picture quality. Simply burn a movie from a PC onto a long-playing Video CD or DVD, then play that disc in a Pioneer AV head unit to gain a new appreciation of in-car theatre.

MP3/WMA/AAC Playback on DVD

- MP3 playback of MP3/WMA music files burned on DVD opens up an intriguing possibility: capacity to store your entire album collection on just one or two discs, without external connections! The capacity of a 4.7 GB DVD disc to store up to around 100 hours of audio (equivalent to approximately 1 000 songs, or 100 full pre-recorded CDs), after all, far surpasses that of a typical CD.

IP-Bus

- Pioneer technology for connecting multiple source units, it now allows connection of external TV tuners, Bluetooth and iPod adaptors as well as other external devices.

Wired Remote control input

- Since entertainment shouldn't compromise driving safety, Pioneer engineered this feature for cars with factory-equipped remote control installed on the steering wheel to give drivers more convenient control of a Pioneer head unit without having to take their hands off the wheel (Optional adapter required, speak to your local Pioneer dealer for more information on these).

Wireless Remote control

- Hand over control of the music to those in the back seat.

Additional features

- JPEG on CD-R/RW, USB, SD, DVD-R/RW
- USB direct connection: USB 2.0 (Full Speed)
- Built-in MPEG-1/-2 Decoder
- Built-in decoder (Dolby Digital , linear PCM)
- 96 kHz / 24 bit DAC (for Audio)
- 10 Bit video DAC
- A/ V inputs and outputs (1 RCA Audio / Video input : 1 RCA Video output)
- 5.8 inch (16:9) QVGA wide TFT active matrix LCD colour screen
- Automatic rear view monitoring in reverse gear (by camera*) Camera not included

Design and specifications subject to change without notice.
