Description

This smart looking unit connects to your iPod via the iPod cable (sold separately CA-DC300N) and allows you to fully control your iPod via the controls of the head unit and it also charges the iPod while you drive. The front AUX input allows you to easily connect MP3 players, so you and your mates can listen to an MP3 player while on the road. You can burn music to disc in MP3 and WMA formats for plenty of sounds from the one disc. If you have a Bluetooth mobile phone, you can connect a Panasonic Bluetooth car kit (sold separately CY-BT200N) for effortless hands free operation and it will allow you to stream music from your cellphone.
