Panasonic CQ-RX420 CD/MP3 Tuner with Front USB & Aux Input

The CQ-RX420 comes with direct iPod control. This means you simply plug your iPod into the front USB port and the CQ-RX420 will charge the iPod and also allow you to control all the iPod functions from the head unit. A great feature, because it allows you to keep your eyes on the road and your iPod will never run out of charge. The front AUX input allows you to easily connect MP3 players, so you and your mates can listen to an MP3 player while on the road. You can burn music to disc in MP3, WMA and AAC formats for plenty of sounds from the one disc. If you have a Bluetooth mobile phone, you can connect a Panasonic Bluetooth car kit (sold separately CY-BT200N) for effortless hands free operation and it will allow you to stream music from your cellphone. Easily plug and play music from a USB stick or from your MP3 player via the front USB port. Plus to help keep your eyes on the road the CQ-RX420 comes with a remote control. The RDS function will keep you in tune with the music stations (Only on stations that broadcast on RDS), listing the song being played and allowing messages from the music stations to come up on display of the CQ-RX420.
