

DD-1512 12" Subwoofer

The 1500 Series woofers are based on the 35/95 series design standards, bringing bass with power and authority to systems designed with 300-500 Watt RMS/per driver power levels. The 1500 Series start with a powerful motor design using a 50mm thick magnet section, thick steel plates with 12mm thick magnet gap. The motor design is topped off with machined cooling vents from our Free Flow Cooling System pimping fresh air around the voice coil. The voice coil uses the same grade wire as our 9500 Series, the same high temperature capability and the same adhesives. All our subs are hand assembled, rigorously tested and retested. We use multiple glue joints for all attachment points. We use the most electrically efficient connections, direct copper to copper, the Direct Connect.

The 1500 Series subs are the real deal; high quality subs at an affordable price that sound great while being durable as possible. We think you should be able to enjoy your system for years to come, and then move your DDs to the next car you buy.

Features:

- » Heat Radiating Coil Former
- » Multi-Spider Suspension
- » Free-Flow Cooling System
- » SFB Cone
- » 2" Voice Coil Diameter
- » RMS/Peak 500/1800
- » Sensitivity 87dB
- » Weight 7.7Kg

RRP \$599.00
