

DD-2512a-2 12" DVC Subwoofer

The 2500 "a" Series subwoofers were designed to extract the highest performance from today's power crazy car audio systems. High powered sound systems require high power subs that are built to handle the load. The 2500s match up well with the 500-800 watt RMS amps driving a single woofer, or the 1000-1600 Watt RMS amps driving a pair. As is with DD's common design practice, the 25s share the same materials as the 35/95s, but with the 2500 motor designed for its target excursion and power range. The 2500 Series subs are the perfect choice for systems stepping up in long term power requirements. The coils are designed using materials with the highest heat resistance on the market and are driven by a precision machined motor structure. The fatigue-resistant parts of the suspension use the finest USA made materials that can be found. These are subs designed to do a job and do it well, to fill your car with the kind of sound that makes you want to keep driving. We've spared no expense to deliver the goods.

Features:

- » Hand Assembled
- » Multi-Spider Suspension
- » Free-Flow Cooling System
- » ERON Surround
- » 2.5" Voice Coil Diameter
- » RMS/Peak 750/3000
- » Sensitivity 88dB
- » Weight 10.89Kg

RRP \$899.00
