

## DD-510 10" Subwoofer

The new 510 and 512 woofers bring DD impact and durability to the most affordable price ranges we've ever offered. You still get the hand built, high performance quality at a price within every budget. The 500 Series was designed to optimize performance from amplifiers in the 100-300 watt RMS range. Not everyone is going to try to crush their tonsils with the latest bass jacked MP3, but that doesn't mean one should have to settle for lower quality parts or design. The 500 series woofers benefit from the highest parts available, close production tolerances, and hand built quality as do all DD woofers. The motor and moving systems have been designed to get higher efficiency from lower powered systems. We found ways to reduce mass from the cone, surround, spiders and voice coil which raises the efficiency on a given level of power. The suspension and excursion capability were carefully dialed in through many real world test samples. The result is a very fast woofer capable of delivering surprising output from modest power sources. The 510 and 512 are very easy to use in vented, sealed, and band-pass boxes and are the perfect presents in gift boxes.

### Features:

- » Optimized for 100-300 watt systems
- » Multi-layer spiders
- » Laminated surround
- » Double stack magnets
- » High-temp voice coil
- » RMS/Peak 300/1200
- » Sensitivity 86.5dB
- » Weight 5.89Kg

**RRP \$399.00**
