

## DD-9512g-2 12" DVC Subwoofer

The 9500 "g" Series was designed with a singular goal in mind, to achieve the highest possible volume levels and do so with the lowest possible distortion. The 9500 models are the most copied and cloned subs in today's car audio market, some even copy the name. The "g" series design takes the 95's to even higher performance levels with a magnet system utilizing over 23 pounds of material and increasing the number of machined cooling vents. These goals combine high efficiency, extended range of motion and high power handling in one package. 95's are engineered without compromise, and without a marketing department trying to capitalize on trendy fads. The long gap design keeps the highly efficient voice coils under power beyond 3 inches throw. Voice coil control at extreme levels is crucial to clean output. The machined motor structure features the FREE FLOW COOLING SYSTEM which pumps cooling air through and around the voice coil with each and every stroke.

The 9500 "g" Series might be the ultimate woofer, hand assembled to the highest tolerances in order to reproduce music as exact as possible, at whatever volume level you desire.

### Features:

- » 406 oz (11.51kg) black chrome edge treated magnet
- » 3" DVC voice coil with 1500 watts continuous power handling
- » Free Flow Cooling System
- » Proprietary EROM surround
- » Multi-layer synthetic spider suspension
- » RMS/Peak 1500/6000
- » Sensitivity 89dB
- » Weight 23.13Kg

**RRP \$1799.00**
