

DD-C6.5

6.5" Component Speakers

These new DD Separates are an excellent way to upgrade sound quality at a price that will please any system budget. These DD Separates consist of 28mm flust-mount tweeters, separate woofers and crossovers. High quality parts are used throughout the drives. The surrounds are formed from a high loss but light weight rubber to smooth the frequency response and keep the sensitivity as high as possible. The surround is attached to an injection, molded, mineral filled polypropylene cone with good internal damping. The inline woofer crossovers feature a midrange EQ contour-circuit to boost or flatten the midrange reponse between 1000-2500Hz. The inline tweeter feature a 0 or -3dB level switch.

The new DD Separates bring high-end performance within reach of any enthusiast, giving high value, ease of installation and high fidelity.
