

Car CD tuner with MP3/WMA playback - DEH-1150MPG

Pioneer

Car CD tuner with MP3/WMA playback DEH-1150MPG

FEATURES: MP3, WMA or WAV music file playback, front Auxiliary input and detachable face

Built in 50W x 4 Channel High-Power MOSFET Amplifier

To minimize voltage loss in its head unit amplifiers, Pioneer built-in high-performance Power MOSFET integrated circuitry into all its head units. The MOSFET amplifier processes signals more efficiently at 50W x 4 maximum total output. This reduces distortion to virtually nothing at high frequency ranges giving you great clear sound.

Front Aux-In Connection

Hook up your portable digital devices with ease in an instant. Each new Pioneer head unit has a built-in AUX input on the front panel so you can connect your iPod, MP3 player and other portable music devices.

EEQ – Easy Equalizer

You can adjust the sound according to the music you listen to. Switch between five preset equalization curves (Super, Bass, Powerful, Natural, Vocal, Flat) simply by pushing an EQ button. You can also boost the volume. Select among three levels of loudness (high/mid/low).

Detachable Face Security

All our entry-level head units have a detachable face that you can hide away or take with you when you park.

Wireless Remote control

Hand over control of the music to those in the back seat.
