

Product Specifications

Pioneer DEH2250UBG CD/MP3 Tuner with front USB for music playback from iPod/iPhone.

Features:

- MP3, WMA, CD-R/CD-RW Playback
- Front USB, Front AUX 3.5mm, iPod/iPhone compatible, Supertuner
- 1 RCA Pre-out, 50w x 4 Channel High-Power MOSFET Amplifier
- EEQ - Easy equalizer, Detachable Face Security, Wireless Remote contro

Whether you listen to music stored onto a portable music player (example: iPod), CD, USB stick, or even tune into your favourite AM/FM radio station, Pioneer's DEH-2250UB CD tuner can accommodate your music needs in the car.

Versatile and powerful, the DEH-2250UB has a convenient USB and auxiliary input on the front, so users can enjoy music from a variety of sources.

To create your in-car sound stage, the DEH-2250UB is powered by Pioneer's renowned MOSFET 50W x 4 Amplifier, which offers optimal levels of performance with minimal distortion and benefits from our unique Advanced Sound Retriever, which automatically restores the sound quality, staging and density of compressed audio files.

And with 1 RCA Pre-out, the DEH-2250UB adds flexibility to your in-car audio setup, enabling you to expand your sound system with an additional amplifier or speakers, for example.

Front USB Connection

Take your favourite MP3 and WMA files for a ride. The DEH-2250UB has a front USB terminal to directly connect a portable digital player, such as an iPod or iPhone, as well as a USB memory device or other. USB-compatible gear, so you can play in your car whatever you have recorded via PC. It's fast and easy. No adapters required.

Design and specifications subject to change without notice.
Note: All products come with full Manufacturers Warranty.

Product Specifications

Front Aux-In Connection

The music connectivity extends beyond USB. Hook up your portable digital devices with ease in an instant. Each new Pioneer head unit has a built-in AUX input on the front panel so you can connect your iPod, MP3 player and other portable music devices.

Advanced Sound Retriever

Hear the glory of original sound across a deeper, wider spectrum from highly compressed MP3 and WMA files stored on a USB memory device. By compensating for data (especially higher frequencies) that tend to get lost in the digital compression process, Pioneer's Advanced Sound Retriever technology enhances audio reproduction nearly all the way up to 20kHz frequencies.

Built in 50W x 4 Channel High-Power MOSFET Amplifier

To minimize voltage loss in its head unit amplifiers, Pioneer built-in high-performance Power MOSFET integrated circuitry into all its head units. The MOSFET amplifier processes signals more efficiently at 50W x 4 maximum total output. This reduces distortion to virtually nothing at high frequency ranges giving you great clear sound.

EEQ – Easy Equalizer

You can adjust the sound according to the music you listen to. Switch between five preset equalization curves (Super, Bass, Powerful, Natural, Vocal, Flat) simply by pushing an EQ button. You can also boost the volume. Select among three levels of loudness (high/mid/low).

Detachable Face Security

All our entry-level head units have a detachable face that you can hide away or take with you when you park.

Wireless Remote control

Hand over control of the music to those in the back seat
