

Product Specifications

Pioneer DEH6150BT CD/USB with Built-in Bluetooth

Introducing a better Hand-free Solution

Simple and Convenient having *Bluetooth* built right into the unit, with no additional hands free car kits or other accessories needed. Built in *Bluetooth* technology with Parrot Module allows for increased phone compatibility (more phone options) and improved noise reduction that can reduce the effect of road noises. Parrot technology also gives you auto Phone book synchronization between your handset and the DEH-6150BT.

More Phonebook Memory

Use with phone pairing to transfer your entire phonebook at a single time to the DEH-6150BT, it can memorize up to 1000 different numbers. Also includes ABC search for easy dialing.

SMS Alert

SMS alert lets you know if you receive any incoming text messages, even if you are listening to loud music. The message alert will play a sound and an icon will appear on the screen.

Phonebook Access

Don't stop the music to make a call. You can access a phonebook without switching from the sound source to *Bluetooth* mode.

"Wireless Audio" Control and streaming

When you're not utilising hands-free calling the DEH-6150BT can use *Bluetooth* Wireless Technology to feed your appetite for entertainment. Using "Wireless Audio" control and streaming (AVRCP, A2DP) you can control and listen to compatible audio player or music phone on your head unit.

Front USB Connection

Take your favorite MP3 and WMA files for a ride. The DEH-6150BT has a front USB terminal to directly connect a portable digital player, USB memory device or other USB-compatible gear, so you can play in your car whatever you have recorded via PC. It's fast and easy. No adapters required.

Design and specifications subject to change without notice.
Note: All products come with full Manufacturers Warranty.

Product Specifications

Direct iPod & iPhone Connection

Connect your iPod or iPhone directly into the DEH-6150BT via the optional CD-IU50 cable. Enjoy complete control of menu's shuffle function, songs, podcast, and audio book chapters on your iPod or iPhone through the head unit interfaces quickly and easily as you were using the device itself. Direct connection also recharges during playback and use.

Link Play for iPod

Listening to an artist that you just can't get enough of and want to hear more? Now you can use Link Play to rediscover music buried in the thousands of songs on your library. You can also have your passenger control your music directly from the iPod

Sub Control

Subwoofer control allow you to adjust the cut-off frequency and output level from your subwoofer, giving you great control of the bass from the Pioneer sound system.

RCA Pre-outs

The provision of output connections for connection to one, two or three amplifiers, the DEH-6150BT has 1 RCA (Selectable rear / Subwoofer)

Direct Sub Drive

Enable you to amplify your front speakers by 2 x 50W while using the rear channel outputs to drive the subwoofer to enjoy outstanding full power bass without an extra amplifier.

Rotary Commander and List keys

Next to the Rotary Commander on the DEH-6150BT sits a large LIST key for extra quick, easy file search and access. Press it to display folder or file lists, rotate the commander dial to search, then press the commander button for playback

Advanced Sound Retriever

Hear the glory of original sound across a deeper, wider spectrum from highly compressed MP3 and WMA files stored on a USB memory device. By compensating for data (especially higher frequencies) that tend to get lost in the digital compression process, Pioneer's Advanced Sound Retriever technology enhances audio reproduction nearly all the way up to 20kHz frequencies.

Built in 50W x 4 Channel High-Power MOSFET Amplifier

To minimize voltage loss in its head unit amplifiers, Pioneer built-in high-performance Power MOSFET integrated circuitry into all its head units. The MOSFET amplifier processes signals more efficiently at 50W x 4 maximum total output. This reduces distortion to virtually nothing at high frequency ranges giving you great clear sound.

Front Aux-In Connection

Hook up your portable digital devices with ease in an instant. Each new Pioneer head unit has a built-in AUX input on the front panel so you can connect your iPod, MP3 player and other portable music devices.

Supertuner IIID

For superior AM/FM radio reception and enjoyment. Digital circuitry is used to deliver excellent radio performance in all conditions including situations where the signal is poor or degraded.

Product Specifications

EEQ – Easy 3 band parametric Equalizer

You can adjust the sound according to the music you listen to. Switch between five preset equalization curves (Super, Bass, Powerful, Natural, Vocal, Flat) simply by pushing an EQ button. You can also boost the volume. Select among three levels of loudness (high/mid/low).

Detachable Face Security

All of our head units have a detachable face that you can hide away or take with you when you leave your car.

Wired Remote control input

Since entertainment shouldn't compromise driving safety, Pioneer engineered this feature for cars with factory - equipped remote control installed on the steering wheel to give drivers more convenient control of a Pioneer head unit without having to take their hands off the wheel.

10 Key Wireless Remote control

Hand over control of the music to those in the back seat.
