

GPS Tracking

Personal & Vehicle

Mongoose brings you really affordable GPS tracking in these amazing products.
Affordable, how ?

Your only costs are the initial purchase price - a SIM card plan - and the ongoing costs of SIM card usage !

There are no added costs for software packages or monitoring fees as Google Maps and Google Earth are freely available on the internet and can be used on any PC or internet capable mobile phone.

PT101 - Personal Tracker

This is one of the worlds smallest portable GPS trackers and is fully self contained. No external antenna - Internal rechargeable battery giving 48 hours standby time .

It is probably the most versatile tracker available as it can be used almost anywhere:- Carry it on your person - Conceal it in your vehicle - Track almost anything or anyone. Includes covert voice surveillance - listen to what is happening around the tracker !

Measures just 69mm (H) 47mm (W) 18mm (D)

Supplied complete with 2 Li-ion batteries, mains charger and a car cigar lighter charger. A hard wired vehicle charger is optional.

VT201 - Vehicle Tracker

Contains all the tracking features to the PT101 but with the added security of being hardwired into your vehicle and car security system - if your alarms sounds, or if your vehicle or trackers battery back-up run low, it sends you warning text messages.

Not portable. Just three wires connect to your vehicle.

No external antenna. 12~24 volt operation.

Want to know where it is ?

Just call the tracker and it replies with a text message giving its latitude and longitude - just type the co-ordinates into Google Maps or Google Earth to show the location.

Features - both models

- Alert if vehicle alarm sounds (VT201 only)
- Call the tracker to find its location
- Voice surveillance - listen covertly
- Auto tracking - set your own reporting frequency
- Move alert - sends an alert if the tracker is moved
- Geo-fence - set a restricted area of movement
- Speed alert - sends an overspeed alert
- SOS - sends 'Help me' alert to all programmed mobiles
- Communicates via GSM. Positioning via GPS
- Text commands control the tracker
- Communicates with up to 5 mobile numbers
- Low battery alert (internal battery for PT101 - internal and vehicle battery for VT210)
