HCB-700 BLUETOOTH HANDSFREE CAR KIT

An exclusive Bluetooth™ Car Handsfree that makes dialling safe and easy. Truly handsfree call handling in the car! Just say the phone number of the person you want to call out loud and the HCB-700 dials it for you. This Voice Digit Dialling feature makes call handling much safer and more convenient. And if the number is already registered in your phone's address book, it's enough to say the name of the person you want to call.

The versatile HCB-700 is made up of two units, which further increases your safety and convenience. Attach the control unit close to your hand. The easy-to-use buttons of the control unit can be used intuitively – you don't have to look at it, but can focus on traffic while scrolling through the menu. Mount the flexible Info display at eye level – for example on the car's dashboard or close to the rearview mirror. When the phone rings you take a quick look at the Info display to see the Caller ID – and decide whether you want to take or reject the call.

Last, but not least – it's a wireless connection. You don't have to take the phone out of your pocket since your mobile phone and the HCB-700 connect automatically. Just turn the ignition key and you're ready to make, take or reject calls in the car.

* Please note that P990/P910 phonebook/call list dialing is not supported.

- Truly handsfree
- Designed for safe driving
- Easy dialling
- Connected to your mobile phone's address book

Installation by an authorized professional is required.
