

# M60i -09

## Remote Controlled Automatic Dual Immobiliser

Automatic engine immobilisers are designed to deter theft by preventing the starting and running of your vehicle's engine. If your vehicle has central locking, the **M60i** can also provide keyless entry - just press the remote button and your doors lock or unlock ! (may require additional parts and cost depending on vehicle type)

Your engine will automatically immobilise 30 seconds after turning the ignition off - so you know your vehicle is always secure.

Is your vehicle turbo charged and has a turbo timer ? No problem, the **M60i** has special software built-in that allows the system to be armed with the engine running with no sacrifice in security. If your vehicle is broken into whilst the engine is running, the engine will stop and be immobilised immediately.

The **M60i** can easily be upgraded to one of the 4 or 5 Star alarm versions by adding the siren and sensor(s) of your choice.

Fully Tested and Certified to the AS/NZ 4601 amendment 1, 2003.

### *Main Features*
