

## MONGOOSE MTP-3 MK2 Vehicle to Mobile Text Pager

WHEREVER YOU ARE, IF YOUR VEHICLE ALARM SYSTEM IS ACTIVATED OR YOUR VEHICLE BATTERY BECOMES LOW, THE MONGOOSE MTP-3 ALERTS YOU BY SENDING A WARNING TEXT MESSAGE TO YOUR MOBILE PHONE.

The MTP-3 is a GSM text pager that is suitable for connection to almost any 12 or 24 volt vehicle alarm system, whether aftermarket or factory fitted\*.

The MTP-3 does not require an extra mobile phone - just insert a GSM SIM card (not supplied).

### SENDS THESE WARNING MESSAGES

#### "WARNING: - ALARM PRE-INTRUDED"

Warns you of a possible attempted intrusion if your alarm system has a pre-warning function (siren chirps when a sensor is activated).

#### "WARNING: - ALARM ACTIVATED"

Warns you that your alarm system has fully sounded by a possible intrusion.

#### "WARNING: - VEHICLE BATTERY LOW"

If your vehicle battery becomes low, the MTP-3 automatically warns you to start your engine to recharge your vehicle battery. Activates at approx 12v. Not applicable on 24 volt vehicles.

#### SURFACE MOUNTED STATUS LED (light emitting diode)

A blue LED shows the status of the pager, such as:

- slow flashing every 4 seconds - normal and connected to the network
- constant on - no cellular coverage - messages will not be sent
- fast flickering - when it is sending or receiving messages

#### PIN CODED PASSWORD PROTECTED

Choose your own PIN password to ensure no one can interfere with your pager.

#### HI-GAIN FLAT ON-GLASS ANTENNA

Unobtrusive and simply affixes to the inside of your windscreen behind the interior mirror to give the best possible GSM network reception.

#### CONTROLLED BY TEXT MESSAGES FROM YOUR MOBILE PHONE

Send simple text commands from your mobile phone to control the pager.

#### SENDS WARNING MESSAGES TO ONE MOBILE PHONE

You can choose, at any time, which mobile phone receives the warnings.

#### TWO TEXT CONTROLLED OUTPUTS

1. Send a text to unlock the doors if the keys get locked inside
2. Send a text to immobilise the engine - separate to any security system already fitted

The outputs may be used for any other application

**As easy to operate as sending a text message !**

This product has been designed to connect to and operate with Mongoose alarms, selected immobilisers & compatible factory fitted vehicle alarm systems. It may not necessarily be fully compatible with other brands/types.

This product is recommended for professional installation but may be installed by suitably skilled persons. Prior to installation purchase a SIM card that does not need to be removed to be re-charged (eg: Vodafone).

**Caution:** The act of responding to an alarm warning text message is your responsibility and the safety of the person attending the vehicle should be paramount. We advise no unnecessary risk to yourself or others.
