Large Vehicle Systems

Complete system kits for commercial vehicles, 4WD's, campervans, buses, motor homes, etc - 12 and 24 volt systems

24 volt Large/Commercial Vehicles

The **CV78HD24** is a complete 32~12 volt system and includes a 7.0 inch dash/screen mounted LCD colour monitor, the a heavy duty wide angle night vision camera and a voltage/video signal processing unit. The processing unit has the ability to connect 2 cameras with heavy duty connectors, plus a third AV via the RCA input. The 20 metre video cable is heavy duty with screw connectors. Input voltage can be from 12v to 32v and is therefore suitable for virtually any vehicle. Add a 2nd camera for trailer units or see to inside a motor-home when driving. Suitable for truck & trailer units with the optional coiled connector.

12 volt Large/Commercial Vehicles

The **CV78HD12** is a dedicated 12 volt system with the same features as the 24 volt system, but excludes the 32~12v voltage/video signal processing unit.
