

# MONITORED SECURITY ALARM SYSTEM

**Do-it-Yourself**  
Wireless Security For Home or Business

- SOLAR POWERED with battery back-up
  - COMPLETELY WIRELESS
  - NO KEYPAD PANEL
  - OPERATES BY REMOTE CONTROL
- Just like a car alarm !
- IDEAL FOR;
- FLATS - SEPARATE GARAGES**  
**APARTMENTS - LOCK-UPS - GRANNY FLATS**

Standard Features
Siren / Control panel containing:-
4 zones - rechargeable lead acid battery for back-up
2 x 2 Button Remote Control with 24hr 'panic'
1 x Wireless PIR (Passive Infra-Red) movement sensor with pet immune capability, adjustable bracket & batteries.
18 metre detector range - 120 degree arc (PIR)
Up to 30 metre transmission range
PIR sensor 'test' mode
1 x Magnetic door trigger with battery
'Tamper' protection
Window warning stickers (4)
Operator and full installation manuals + fixings
2 year product warranty
Programmable features
Personal security code & zone code
Siren sounding time
Accessories – extra cost
6 zone control panel with built-in telephone dialler
Wireless Magnetic Door Trigger – MDT01
Wireless PIR movement sensors – IR-02
Remote controls – RM03
Window stickers

## Standard Features

Siren / Control panel containing:-  
4 zones - rechargeable lead acid battery for back-up  
2 x 2 Button Remote Control with 24hr 'panic'

1 x Wireless PIR (Passive Infra-Red) movement sensor with pet immune capability, adjustable bracket & batteries.  
18 metre detector range - 120 degree arc (PIR)  
Up to 30 metre transmission range  
PIR sensor 'test' mode  
1 x Magnetic door trigger with battery

'Tamper' protection  
Window warning stickers (4)  
Operator and full installation manuals + fixings  
2 year product warranty

## Programmable features

Personal security code & zone code  
Siren sounding time

## Accessories – extra cost

6 zone control panel with built-in telephone dialler  
Wireless Magnetic Door Trigger – MDT01  
Wireless PIR movement sensors – IR-02  
Remote controls – RM03  
Window stickers

• Easy 'Do-It-Yourself' Installation

• Kit includes :-

1 x Exterior solar powered siren and control panel

1 x PIR Movement Detector

1 x Magnetic Door Trigger

2 x Remote Controls

4 x Window Stickers

1 x Operator & Installation Manual

All Batteries Included

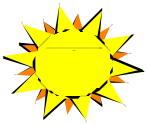

OPTIONS:-

Extra Magnetic Triggers  
Extra PIR Sensors  
Extra Remote Controls  
Control panel with built-in telephone dialler

\* Whilst this security product provides a deterrent it may not prevent theft or damage through wilful criminal intent.  
Specifications and/or conditions may change without prior notification.

## Solar-Powered SIREN / CONTROL PANEL

This 'SolarGuard' wireless exterior control panel, siren & strobe uses digital radio frequency, proven solar power & micro processor technology to make it totally wire free.

The exterior siren is also the control panel. The sensors and remote controls communicate directly with it.

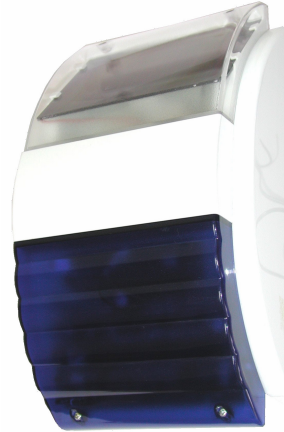

When you exit the house, just use the remote to arm the system, the siren chirps as confirmation of arming – disarm the system, 3 chirps, before you enter the house.

The highly sensitive light activated solar panel charges & maintains the internal lead-acid battery even on overcast days.

It is fully protected by a tough polycarbonate & UV proof housing with all electronic components protected with moisture repellent materials applied during manufacture.

It features two in 115dB sirens, battery back-up and a bright Xenon strobe light. The strobe light will latch on after an activation to warn you of a possible intrusion before you enter your home.

Note: If your property does not have sufficient light, the siren/control panel can be mains powered by a 240v~12v adaptor – not supplied.

## REMOTE CONTROL

Two remote controls are supplied which allow you to arm and disarm the system. The 'panic' button allows you to sound the alarm system whether it is armed or disarmed - 24 hours a day !

Any number of remotes can be used.

## 'PIR' MOVEMENT SENSORS

One 'PIR' (passive infrared) movement sensor is supplied. PIR's sense movement by detecting changes in the infra red heat pattern caused for example by an intruder entering a room. A wireless security coded signal is then transmitted to the siren control panel which, if armed, activates the alarm.

The sensors can also be immune to pets false triggering the alarm by the attachment of special blanking panels.

They can detect movement up to 18 metres away over a 120 degree arc and then transmit its signal back to the control panel up to 25~30 metres. Any number of sensors may be used.

## 'MDT' MAGNETIC DOOR/WINDOW TRIGGER

One supplied magnetic door/window trigger provides security when attached to doors, windows or ranch slider and are designed to trigger the alarm when these are opened.

You can install as many as you wish to give your home the maximum protection.

You will need one sensor per door or window or the optional magnetic switches can be 'daisy chained' together.

## Do-it-Yourself Installation

The system can be easily installed by the home handyman. Everything is supplied including instructions, all the batteries and fixing screws.

All you need is basically a screw driver, an electric drill and a ladder when installing the exterior control panel / siren unit.
