# 1 Important

# Safety

- Read and understand all instructions before you use your apparatus. If damage is caused by failure to follow instructions, the warranty does not apply.
- This apparatus is designed for negative ground (earth) 12 V DC operation only.
- To ensure safe driving, adjust the volume to a safe and comfortable level.
- Improper fuses can cause damage or fire. When you need to change the fuse, consult a professional.
- Use only the supplied mounting hardware for a safe and secure installation.
- To avoid short circuit, do not expose the apparatus, remote control or remote control batteries to rain or water.
- Never insert objects into the ventilation slots or other openings on the apparatus.
- Clean the apparatus and frame with a soft, damp cloth. Never use substances such as alcohol, chemicals or household cleaners on the apparatus.
- Never place any objects other than discs into the apparatus.
- Never use solvents such as benzene, thinner, cleaners available commercially, or anti-static sprays intended for discs.
- Visible and invisible laser radiation when open. Avoid exposure to beam.
- Risk of damage to the apparatus screen!
   Never touch, push, rub or strike the screen with any object.

# !

#### Caution

 Use of controls or adjustments or performance of procedures other than herein may result in hazardous radiation exposure or other unsafe operation.

## **Notice**

The making of unauthorized copies of copy-protected material, including computer programs, files, broadcasts and sound recordings, may be an infringement of copyrights and constitute a criminal offence. This equipment should not be used for such purposes.

This apparatus includes these labels:

Class II equipment symbol

This symbol indicates that the apparatus has a double insulation system.

# Recycling

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

When you see the crossed-out wheel bin symbol attached to a product, it means the product is covered by the European Directive 2002/96/EC:

Never dispose of your product with other household waste. Please inform yourself about the local rules on the separate collection of electrical and electronic products. The correct disposal of your old product helps prevent potentially negative consequences on the environment and human health.

Your product contains batteries covered by the European Directive 2006/66/EC, which cannot be disposed of with normal household waste.

Please inform yourself about the local rules on separate collection of batteries. The correct disposal of batteries helps prevent potentially negative consequences on the environment and human health.

This product complies with the radio interference requirements of the European Community.

This product complies with the requirements of the following directives and guidelines: 2004/108/EC + 2006/95/EC.

#### Environmental information

All unnecessary packaging has been omitted. We have tried to make the packaging easy to separate into three materials: cardboard (box), polystyrene foam (buffer) and polyethylene (bags, protective foam sheet.)

Your system consists of materials which can be recycled and reused if disassembled by a specialized company. Please observe the local regulations regarding the disposal of packaging materials, exhausted batteries and old equipment.

Any changes or modifications made to this device that are not expressly approved by Philips Consumer Lifestyle may void the user's authority to operate the equipment.

2009 © Koninklijke Philips Electronics N.V. All rights reserved.

Specifications are subject to change without notice. Trademarks are the property of Koninklijke Philips Electronics N.V. or their respective owners. Philips reserves the right to change products at any time without being obliged to adjust earlier supplies accordingly.

# 2 Your car audio system

Congratulations on your purchase, and welcome to Philips! To fully benefit from the support that Philips offers, register your product at www.philips.com/welcome.

# Introduction

With the in-car audio system, you can enjoy your drive while you listen to:

- FM or AM (MW) radio
- Audio from CD or MP3 disc
- Audio from your mobile phone
- Audio from a USB drive
- Audio from a SD/SDHC/MMC card
- Audio from external devices

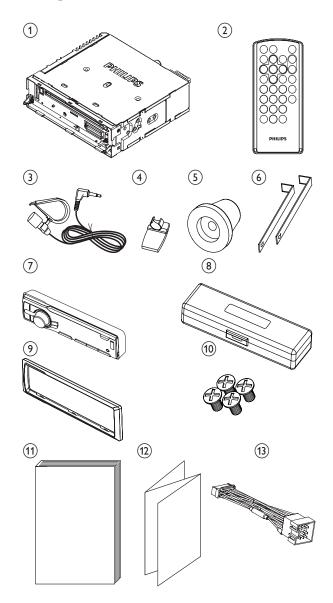

Besides, you can make a call, answer and hang up a call on the audio system.

# What's in the box

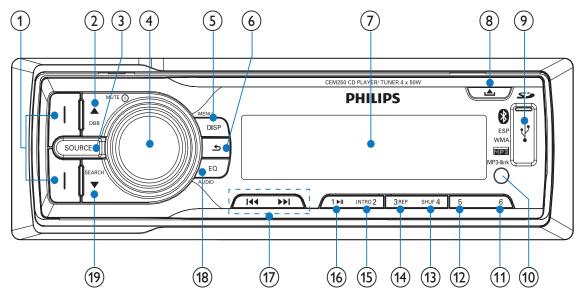

Check and identify the contents of your package:

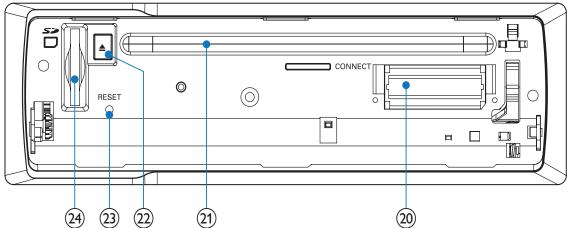

- 1 Car audio system
- 2 Remote control
- (3) Microphone
- (4) Microphone hold
- (5) Rubber cushion
- 6 Disassembly tool (2 pieces)
- 7 Front panel
- 8 Carrying case for front panel
- 9 Trim plate
- (10) Screw (4 pieces)
- (11) User manual

- (12) Quick start guide
- (13) Standard connector

# Overview of the main unit

# (1) | (green/red)

- Answer phone (green).
- Dial number (green).
- View call log (green).
- Terminate call (red).

#### (2) ▲/ DBB

- Select tuner band.
- Select MP3/WMA folder.
- Scroll up menu.
- Turn on or off Dynamic Bass Boost (DBB) sound.
- Select RDS program type.

# 3 SOURCE

- Select audio source.
- Connect or disconnect bluetooth connection.

#### (4) ①/MUTE

- Turn the unit on or off.
- Adjust volume.
- Confirm selection.
- Enter characters for search.
- Dial phone number.
- Mute or restore the volume.

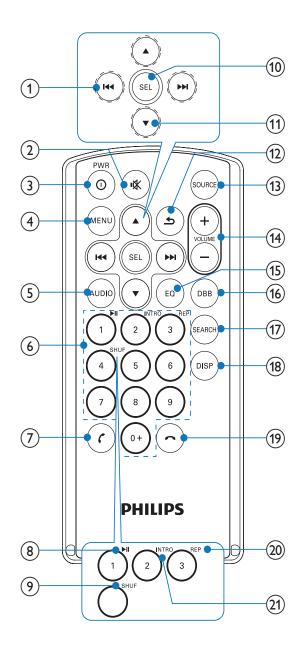

#### (5) MENU/DISP

- Display radio frequency, clock and radio program type (if available).

- Set repeat play mode.
- Select preset station 3.
- Enter phone number.

## (21) INTRO, 2

- Turn intro play on or off.
- Select preset station 2.
- Enter phone number.

# 3 Get started

# !

#### Caution

• Use the controls only as stated in this user manual.

Always follow the instructions in this chapter in sequence.

If you contact Philips, you will be asked for the model and serial number of your apparatus. The model number and serial number are on the bottom of your apparatus. Write the numbers here:

Model No.	
Serial No.	

# Install the car audio

These instructions are for a typical installation. However, if your car has different requirements, make the corresponding adjustment. If you have any questions regarding installation kits, consult your Philips car audio dealer.

#### Caution

- This unit is designed for negative ground (earth) 12 V DC operation only.
- Always install this unit in the car dashboard.
   Other locations can be dangerous as the rear of the unit heats up during use.
- To avoid short-circuit: before you connect, ensure that the ignition is off.
- Ensure that you connect the yellow and red power supply leads after all other leads are connected.
- Ensure that all loose leads are insulated with electrical tape.
- Ensure that the leads do not get caught under screws orin parts that will move (e.g. seat rail).
- Ensure that all ground (earth) leads are run to a common ground (earth) point.
- Use only the supplied mounting hardware for a safe and secure installation.
- Improper fuses can cause damage or fire.
   When you need to change the fuse, consult a professional.

#### Note on the power supply lead (yellow)

• When you connect other devices to this apparatus, ensure that the rating of the car circuit is higher than the total fuse value of all the connected devices.

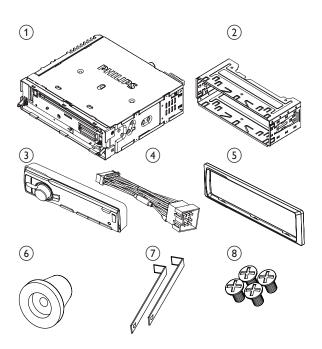

#### Notes on speaker connection

- Never connect speaker wires to the metal body or chassis of the car.
- Never connect speaker wires with stripes to one another.

# Overview of parts

These are the supplied parts needed to connect and install this unit.

- 1 In-car audio system
- (2) Sleeve
- (3) Front panel
- (4) Standard connector
- 5 Trim plate
- (6) Rubber cushion
- 7 Disassembly tools
- 8 Screws (4 pieces)

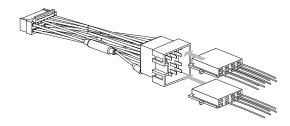

# Connection: for cars with ISO connectors

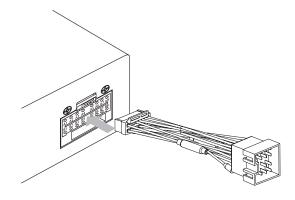

#### Caution

- Ensure that all loose leads are insulated with electrical tape.
- Pull out the ISO connectors from car dashboard and connect them to the bigger end of the supplied standard connector.

 $\mathbf{2}$  Connect the other end of the supplied standard connector to the unit.

Connect the antenna and amplifier as illustrated, if applicable.

	Connector	Connect to
1	MIC	Microphone
2	FRONT LINE	Front right
	OUT R	speaker
3	FRONT LINE	Front left
	OUT L	speaker
4	REAR LINE	Rear right
	OUT R	speaker
5	REAR LINE	Rear left speaker
	OUT L	
6	SUB OUT	Subwoofer
7	ANTENNA	Antenna

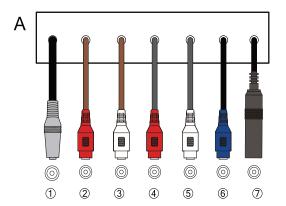

# Connection: for cars without ISO connectors

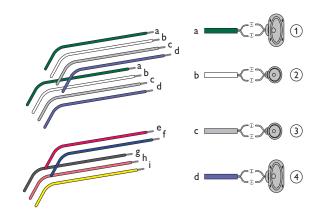

#### Caution

- Be sure to connect the black ground (earth) lead first.
- Connect the antenna and amplifier as illustrated, if applicable.

 $\bigcirc$ 

	Connector	Connect to
1	MIC	Microphone
2	FRONT LINE	Front right
	OUT R	speaker
3	FRONT LINE	Front left
	OUT L	speaker
4	REAR LINE	Rear right
	OUT R	speaker
5	REAR LINE	Rear left speaker
	OUT L	
6	SUB OUT	Subwoofer
7	ANTENNA	Antenna

1	Green/black strip	Left speaker
		(Rear)
2	White/black strip	Left speaker
		(Front)
3	Gray/black strip	Right speaker
		(Front)
4	Purple/black strip	Right speaker
		(Rear)
		·

- 2 Cut off the bigger end of the supplied standard connector.
- 3 Check the car's wiring carefully and connect them to the supplied standard connector.

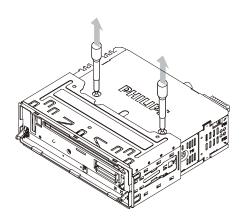

е	RED	Ignition key +12V DC when ON/ACC
f	BLUE	Motor/electric antenna relay control lead/Amplifier relay control lead
g	BLACK	Ground
h	ORANGE/ WHITE	Illumination switch
i	YELLOW	To the +12V car battery which is energized at all times

Connect the supplied standard connector to the unit.

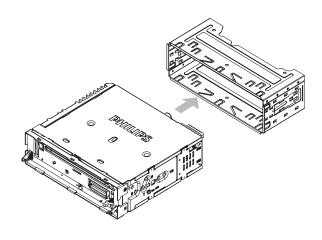

# Mount in the dashboard

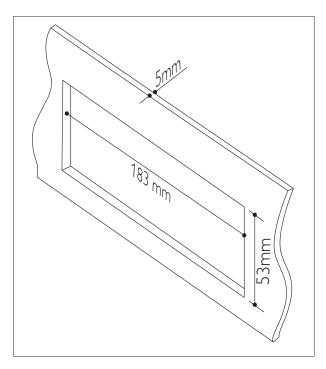

- 1 If the car does not have an on-board drive or navigation computer, disconnect the negative terminal of the car battery.
  - If you disconnect the car battery in a car that has an on-board drive or navigation computer, the computer may lose its memory.
  - If the car battery is not disconnected, to avoid short-circuit, ensure that bare wires do not touch each other.
- Remove the two screws on the top of the unit.

Remove the mounting sleeve with the supplied disassembly tools.

Ensure that car dashboard opening is within these measurements:

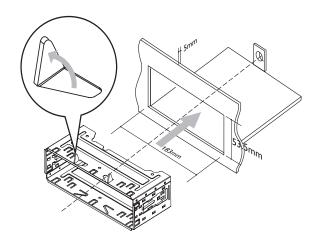

Install the sleeve into the dashboard and bend the tabs outward to fix the sleeve.

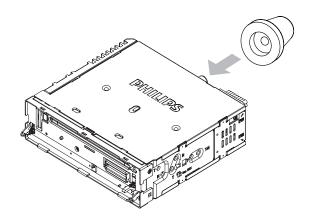

#### Note

• Skip this step if the unit is not fixed by sleeve but by supplied screws.

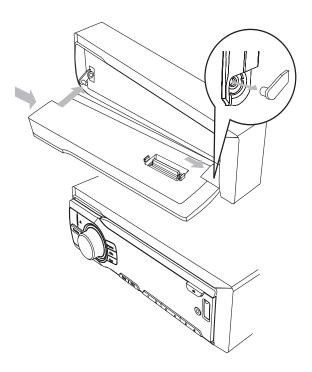

6 Place the supplied rubber cushion over the end of the mounting bolt.

- 7 Slide the unit into the dashboard until you hear a click sound.
- **8** Reconnect the negative terminal of the car battery.

# Attach the front panel

1 Attach the trim plate.

- 2 Insert the right side of the panel in the chassis until it is correctly engaged.
- **3** Press the left side of the panel and point the left hole at the left pillar.
- **4** Release the panel to engage the left side.

# Install remote control battery

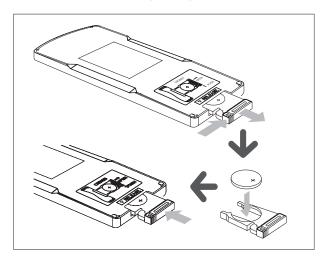

#### Caution

- Risk of explosion! Keep batteries away from heat, sunshine or fire. Never discard batteries in fire.
- Risk of decreased battery life! Never mix different brands or types of batteries.
- Risk of product damage! When the remote control is not used for long periods, remove the batteries.
- Perchlorate Material special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate.

#### For first-time use:

- 1 Remove the protective tab to activate the remote control battery.
- 2 Open the battery compartment.
- Insert 1 CR2025 batteries with correct polarity (+/-) as indicated.
- 4 Close the battery compartment.

# Turn on

- 1 Press Oto turn on the unit.
  - To turn off the unit, press ⊕ for 3 seconds.

# Set clock

- 1 Press MENU/DISP for 3 seconds.
- Press ▲ or ▼ repeatedly until the currently time is displayed.
- **3** Turn Φ clockwise to set hour.
- 4 Press  $\emptyset$  to confirm.
- **5** Turn Φ anti-clockwise to set minute.
- **6** Press  $\emptyset$  to confirm.

#### View clock

1 Press MENU/DISP repeatedly until the clock is displayed.

# 4 Listen to radio

## Tune to a radio station

- 1 Press **SOURCE** repeatedly to select Tuner.
- Press ▲ or ▼ to select band: [FM1], [FM2], [FM3], [AM1], or [AM2].
- Press I◀◀ or ▶▶I to tune to a radio station manually.
  - → The radio station is broadcast.
  - → To search for a radio station automatically, press **SEARCH** for 3 seconds.

# Select tuner sensitivity

You can adjust the tuner sensitivity if you want to receive more radio stations or only stations with strong signal.

- 1 Press MENU/DISP for over 2 seconds.
- Press ▲ or ▼ repeatedly until [LOCAL] or [DX] is displayed.
- **3** Rotate  $\circ$  to select a setting:
  - [LOCAL] (local): Only stations with strong signal can be broadcast.
  - [DX] (distance): Stations with strong and weak signals can be broadcast.
- **4** Press Φ to confirm the selection.

# Select stereo/mono broadcasting

For stations with weak signals: to improve the reception, change to monoaural sound.

- 1 Press MENU/DISP for 3 seconds.
- Press ▲ or ▼ repeatedly until [STEREO] or [MONO] is displayed.
- **3** Turn Φ to select a setting:
  - [STEREO]: stereo broadcast.
  - **[MONO]**: mono broadcast.
- 4 Press & to confirm the selection.

# Store radio stations in memory

You can store up to 6 stations in each band.

# Store staions automatically

- 1 Press **SEARCH** for 3 seconds.
  - → The six strongest stations of the selected band are saved in preset channels 1-6 automatically.

# Store staions manually

- 1 Tune to a station that you want to store.
- Press one of the numbered buttons 1 to 6 for 3 seconds.
  - → The station is saved in the selected channel.

# Tune to a preset station

- 1 Press ▲ or ▼ to select band.
- 2 Press the number button 1 to 6 to select the preset station.

# Play with RDS

The RDS (Radio Data System) function operates only in areas with FM stations broadcasting RDS signals. If you tune to an RDS station, an RDS icon and information about the presenter, station or program is displayed.

#### Turn on RDS

#### Note

- By default, the RDS function is off.
- 1 Press MENU/DISP for 3 seconds.

- 2 Turn ⊕ to select [RDS ON]:→ [RDS] is displayed.
- To turn off the RDS function, repeat steps above and choose [RDS OFF].

## Select program type

Before tuning to RDS stations, you can select program type and let the unit search only for programs of the selected category.

- 1 Press ▼/SEARCH until [AUTO--SCN] or [PTY] is displayed.
- 2 Press ▲ or ▼ to select [PTY], then press ①/MENU to confirm.
- Turn ▲ or ▼ to select a program type, then press ①/MENU to start searching.
   → "PTY SEEK" is displayed.

Item	Program type	Description

#### Store RDS stations

You can store up to six (6) RDS stations in each FM band in preset channels.

#### Note

- If you have stored radio stations in the preset channels (see 'Store radio stations in memory' on page 17), below operation will replace the pre-stored stations.
- **1** Turn on RDS (see 'Turn on RDS' on page 17).
- 2 Select band:[FM1], [FM2] or [FM3].
- **3** Press**SEARCH**/**▼** for 3 seconds.
  - → [AUTO SCN] or [PTY] is displayed.
- 4 Press ▲ or ▼ to select [AUTO SCN].
- **5** Press O to start searching.
  - → Six RDS stations with strongest signal are stored in channel 1 to 6.

# Select alternate frequencies

If the radio signal come from the current station is poor, you can turn on the AF (Alternate Frequency) function to let the unit searches for another station with stronger signal but with the same program identification as the current station automatically.

- 1 Press MENU/DISP for 3 seconds.
- Press ▲ or ▼ repeatedly until [AF] is displayed.
- **3** Turn  $\odot$  to select a setting:
  - [AF ON]: Turn on the AF mode.
  - [AF OFF]: Turn off the AF mode.

# Set region for AF tuning

You can define AF tuning region:

[REG ON]	Only stations in the current region can be tuned to automatically.
[REG	All stations can be tuned to
OFF]	automatically.

- 1 Press MENU/DISP for 3 seconds.
- Press ▲ or ▼ repeatedly until [REG] (Regional Radio) is displayed.
- **3** Turn ① to select a setting.

## Receive traffic announcement

If you do not want to miss traffic announcement during enjoying music, you can turn on the TA (Traffic Announcement) function.

- 1 Press MENU/DISP for 3 seconds.
- Press ▲ or ▼ repeatedly until [TA] is displayed.

- **3** Turn  $\odot$  to select a setting:
  - **[TA ON]**: When there is traffic announcement, the unit switches to the tuner mode (regardless of the current mode) and begins to broadcast the announcement on traffic conditions. When the traffic announcement is over, it returns to the previous mode.
  - **[TA OFF]**: Traffic announcement does not cut in.

#### Set TA volume

When TA (traffic announcement) signal is interrupted, the volume can keep at a preset level. Follow steps below to set TA volume:

- 1 Press MENU/DISP for 3 seconds.
- 2 Press ▲ or ▼ repeatedly until [TA VOL] is displayed.
- 3 Turn  $\Phi$  to select a volume level: 12(minimum) to 45(maximum).

# 5 Use bluetooth devices

With this car audio system, you can listen to audio files from a player or make a call if bluetooth connection is available on your phone or player.

# Pairing bluetooth devices

You can pair your bluetooth device with the unit as follows:

- Turn on bluetooth function on the device.
- Setup bluetooth fuction on your device.
- Select "CEM250" in the pairing list.
- Enter default password "0000".
  - → "[CONNECT]" is displayed on the panel if pairing succeeds.

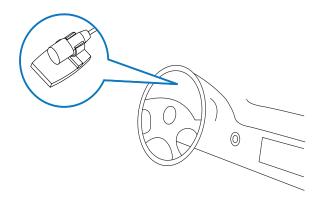

- If the paired device is moved beyond the operational range, when it is brought back, please check if the device is still connected with the system:
- . If they are connected, [Disconnect] (red icon) is displayed.
- . If connection is lost, [Connect] (green icon) is displayed. Follow the instruction above to pair the device with the system again.

# Adjust microphone position

For better sound quality in make/receive phone call through Bluetooth, place the microphone at a location close to mouth.

- Make sure the supplied microphone is connected to the car audio system. (See "Connect wires" section).
- 2 Place the microphone at a proper location. For example,

Sticked it onto the dashboard.

Or clip it on the sun-shield.

# Voice dialing

You can dial a number by voice if your mobile phone supports voice dialing.

- Press f for 3 seconds.
  - → [VOIC DIAL] is displayed.
- Speak a name stored in contact list stored in the phone.
  - → The unit repeats the number and calls out.
  - → [NO MATCH] is displayed if the unit does not recognize a number.

# Make a call

- Press **SOURCE** repeatedly to select **[BT** MUSIC1.
- Press C.
- Press ▲ or ▼ to select from the following
  - [DIAL NUM]: dial a number directly
  - [DIALLED]: dialled number
  - [MISSED]: missed call
  - [RECEIVED]: received call
  - [ME PBK]: Phone directory
  - [SIM PBK]: SIM card directory
- Press  $\Phi$  to confirm the selection.

To dial a number directly, select [DIAL NUM].

- 1 Press 0-9 to enter phone number.
  - Press ► to change a number.
  - Press to reset entered numbers.
- 2 Press ( to dial.

To use a number in call log or directory, select the options other than **[DIAL NUM]**.

- 1 Turn ① to select a number from call log or directory.
- 2 Press ( to dial.

# Call waiting

If there is another incoming call during call, **[CALL WAITING]** flashes on the display panel.

- 1 Press ( to terminate the present call.
  - → The other call is automatically answered.
  - → The first call is terminated.

# Call transfer

You can transfer voice from loudspeaker to mobile phones during call.

**1** Press *C*.

**→ [TRANSFER]** is displayed.

# Terminate call

1 Press 
to terminate call.

# Play audio files

You can listen to audio from a bluetooth device and control playback with the unit.

- 1 Press SOURCE repeatedly to select [BT MUSIC].
- To play, press 1, ►II.
- To pause, press 1,▶ III again.

# 6 Play audio files

# Note

• Ensure that the disc or device contains playable

# Play a disc

#### Note

· You cannot play CDs encoded with copyright protection technologies.

You can play commercially available audio CDs and these discs:

- CD-Recordables (CD-R)
- CD-Re-writables (CD-RW)
- MP3 CDs
- WMA CDs

#### Note

• Ensure that the disc contains playable content.

You can play DVD discs with the following region codes:

# DVD region code Countries Asia Pacific, Taiwan, Korea

- 1 Press 📤 on the front panel to release the panel.
- 2 Insert a CD with the printed side facing up.
- Close the panel.
- Press 1, ►II to start play.
- To pause CD play, press 1►II.
- To resume CD play, press 1▶ II again.

#### Remove the CD

To take out the CD,

- Press .
- Press ≜ beside the disc slot.

• If the disc is blocked in the disc compartment, press and hold \( \Delta\) until the disc comes out.

# Play from USB/SD/SDHC/ MMC device

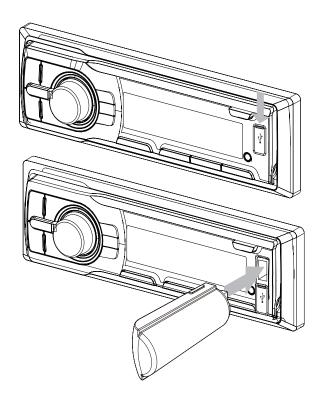

#### Note

• Ensure that the USB or SD/SDHC/MMC device contains playable music.

#### Insert the USB device

Open the cover marked south front panel.

- 2 Insert the USB device into the USB socket.
  - → The unit starts playing from the USB device automatically.

#### Remove the USB device

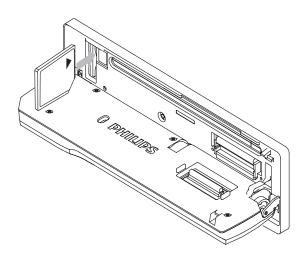

- **1** Press and hold  $\Phi$  to turn off the unit.
- **2** Remove the USB device.

#### Insert a card

#### Note

- This unit supports SD, SDHC, and MMC cards.
- 1 Press to release the panel.
- 2 Insert the SD or MMC card into the card slot.
  - → The unit starts playing from the SD/ MMC card automatically.

#### Remove the card

- **1** Press <sup>⊕</sup> to turn off the unit.
- 2 Press the card until you hear a click sound.
  - → The card is now disengaged.
- **3** Remove the card.

# Control play

- To select a folder, press ▲ or ▼.
- To skip to the previous/next track, press
   I◀◀ or ►►I.
- To search backward/forward rapidly within the current track, press I◀◀ or ▶►I for 3 seconds.
- To pause, press 1,▶■■.
- To resume play, press 1,▶ II again.

# Search for an MP3/WMA track

- 1 Press **SEARCH** for 3 seconds.
  - → Search menu is displayed.
  - → [FILE]: search by track name.
  - → [FOLDER]: search by folder sequence.
- 2 Turn ① to select [FILE] and then press ① to confirm.
- **3** Turn Φ to enter a character and then press Φ.
- 4 Repeat step 3 until the search term is complete.
- **5** Press  $\emptyset$  for 3 seconds to start search.
  - When search is finished, a list of matching tracks are displayed.
- 6 Turn Φ to skip over the list.
- **7** Press  $\emptyset$  to select a track.

# View play information

- 1 During play USB/SD/MMC device, press MENU/DISP repeatedly to view:
  - Track number and elapsed play time
  - Artist
  - Album
  - Title
  - Folder
  - File
  - Clock

# Intro play

# Remove the unit

You can remove the unit from the dashboard.

- Detach the front panel.
- Pull out the unit by using the removal

# 10 Product information

• Product information is subject to change without prior notice.

Power supply	12 V DC (11 V - 16
	V), negative ground
Fuse	15 A
Suitable speaker	4 - 8 Ω
impedance	
Maximum power	50 W x 4 channels
output	
Continuous power	24 W x 4 channels (4
output	Ω 10% T.H.D.)
Pre-Amp output	2.0 V ( USB play
voltage	mode; 1 kHz, 0 dB, 10
	kΩ load)
Subwoofer output	2.0 V (USB play
voltage	mode: 61 Hz, 0 dB, 10
	kΩ load)
Aux-in level	≥500 mV
Dimensions (W x H	188 x 58 x 190 mm
×D)	
Weight	1.0 kg

#### Radio

Frequency range - FM	87.5 - 108.0 MHz (100kHz per step in auto search and 50kHz per step in manual search)
Frequency range - AM(MW)	522 - 1620 KHz
Usable sensitivity - FM	8 μV
Usable sensitivity - AM(MW) (S/N = 20 dB)	30 µV

#### Compatible USB devices:

- USB flash memory (USB 2.0 or USB1.1)
- USB flash players (USB 2.0 or USB1.1)
- memory cards (SD / MMC / SDHC)

#### Supported formats:

- USB or memory file format: FAT16, FAT32
- MP3 bit rate (data rate): 32-320 Kbps and variable bit rate
- WMA v9 or earlier
- Directory nesting up to a maximum of 8 levels
- Number of albums/ folders: maximum 99
- Number of tracks/titles: maximum 999
- ID3 tag v2.0 or later
- File name in Unicode UTF8 (maximum length: 128 bytes)

#### Unsupported formats:

- Empty albums: an empty album is an album that does not contain MP3/ WMA files, and is not be shown in the display.
- Unsupported file formats are skipped. For example, Word documents (.doc) or MP3 files with extension .dlf are ignored and not played.
- AAC, WAV, PCM audio files
- DRM protected WMA files (.wav, .m4a, .m4p, .mp4, .aac)
- WMA files in Lossless format
- ISO9660, Joliet
- Maximum title number: 512 (depending on file name length)
- Maximum album number: 255
- Supported sampling frequencies: 32 kHz, 44.1kHz, 48 kHz
- Supported Bit-rates: 32~256 (kbps), variable bit rates

# 11 Troubleshooting

#### Caution

• Never remove the casing of this apparatus.

To keep the warranty valid, never try to repair the system yourself.

If you encounter problems when using this apparatus, check the following points before requesting service. If the problem remains unsolved, go to the Philips web site (www. philips.com/support). When you contact Philips, ensure that your apparatus is nearby and the model number and serial number are available.

#### No power or no sound.

- Car engine is not on. Turn the car engine on.
- Cable is not correctly connected. Check connections.
- Fuse is burnt. Replace fuse (see 'Reset' on page 28).
- Volume is too low. Adjust volume.
- If the above solutions cannot help, press the RESET button.
- Ensure that the track played is of a compatible format.

#### Noise in broadcasts.

- Signals are too weak. Select other stations with stronger signals.
- Check the connection of the car antenna.
- Change broadcast from Stereo to mono (see 'Select stereo/mono broadcasting' on page 17).

#### Cannot play disc

- Ensure that the disc label is inserted with the printed side facing up.
- Wipe the disc with fibre cleaning cloth from the centre to the edge in a straight line
- This disc may be defective. Play another disc.

- Ensure that the CD is a finalised CD/ CD-R/CD-RW.
- Ensure that the CD is not encoded with copyright protection technologies.

#### The CD skips tracks

- Ensure that the CD is not damaged or dirty.
- Ensure that random mode is deactivated.

#### Disc cannot be ejected

Press and hold ▲.

#### Preset stations lost.

Battery cable is not correctly connected.
 Connect the battery cable to the terminal that is always live.

#### Display show ERR-1

 The disc, USB or SD device cannot be read in two minutes.

#### Display show ERR-3

- USB/SD/MMC data error.
- Disc is upside down. Ensure the printed side is facing up.

#### Display show ERR-5

Communication error or component is damaged.

# About Bluetooth device

# Cannot pair the Bluetooth enabled device with the car audio system.

- The device does not support the profiles required for the system.
- The Bluetooth function of the device is not enabled. Refer to the user manual of the device for how to enable the function.

# The audio quality is poor after connection with a Bluetooth-enabled device.

- The microphone is not correctly positioned. Adjust the position of the microphone. For example, stick the microphone onto the dashboard where close to the driver.
- The Bluetooth reception is poor. Move the device closer to the car audio system or remove any obstacle between the device and the system.

# Music playback is unavailable on the system even after successful Bluetooth connection.

The device cannot be used with the system to play music.

# The paired mobile phone connects and disconnects constantly.

- The Bluetooth reception is poor. Move the mobile phone closer to the car audio system or remove any obstacle between the mobile phone and the system.
- Some mobile phones may connect and disconnect constantly when you make or end calls. This does not indicate any malfunction of the system.
- For some mobile phones, the Bluetooth connection may be deactivated automatically as a power-saving feature.
   This does not indicate any malfunction of the system.

# 12 Glossary

# M

#### MMC

MultimediaCard. A type of memory card with a flash memory.

#### MP3

A file format with a sound data compression system. MP3 is the abbreviation of Motion Picture Experts Group 1 (or MPEG-1) Audio Layer 3. With the MP3 format, one CD-R or CD-RW can contain about 10 times more data than a regular CD.

# S

#### SD

Secure Digital. A type of memory card with a flash memory.

#### **SDHC**

Secure Digital High Capacity (SDHC) is a type of flash memory card based on the SDA 2.00 specification. The SDA 2.00 specification enables SD cards to reach higher capacities from 4GB to 32GB, and growing.

#### WMA (Windows Media Audio)

An audio format owned by Microsoft, is a part of Microsoft Windows Media technology. Includes Microsoft Digital Rights Management tools, Windows Media Video encoding technology, and Windows Media Audio encoding technology.
