C.A.T SCAT10F Steeromg Wheel Interface

Do you have a vehicle with steering wheel buttons and want to upgrade your headunit with a "high performance" system and realised the steering wheel buttons won't work?

If so you'll need THE CAT. It's a car audio steering wheel interface that allows you to replace the standard audio system, whilst retaining the steering wheel audio functions..

HOW DOES THE CAT WORK?

- 1. THE CAT recieves a signal when a button is pressed from the steering wheel.
- 2. THE CAT then converts the signal to be understood by the headunit.
- 3. THE CAT then sends the signal either via infrared or direct connect to the headunit.

No programming involved - frequencies are already programmed in therefore no delay between button presses..

Design and specifications subject to change without notice. **Note: All products come with full Manufacturers Warranty**.

AFTER MARKET HEADUNIT & VEHICLE COMPATIBILITY

Is suitable for the following vehicles with standard steering wheel controls:

Holden VR Ford AU1

Holden VS

Ford AU2

Holden VT

Ford AU3

Holden VX

Ford BA

Holden VY

Ford Territory

Holden VZ

Mazda 3

Holden XC Barina

Mazda 6

Holden TK Barina

Mitsubishi 380

Holden ZC Astra

Aftermarket headunits with either infrared capabilities or 3.5mm jack for direct connect:

Alpine*

Kenwood*

Clarion*

Panasonic

Eclipse*

Pioneer

JVC

Sony

*The CAT10 now comes with the direct connect capabilies so you can connect straight to Alpine, Clarion, Eclipse and Kenwood headunits with the 3.5mm jack.

We recommend THE CAT is installed by a qualified car audio installer. For more information, please view our Installation Instructions:

STEP TWO: CONNECT WIRING TO CAR HARNESS

TO WIRE THE CAT POWER AND TRIGGER SIGNALS: Join the CAT10 Red to Accessories and Black to Ground. Where the Antenna Out switches (Non-RDS unita) join the CAT10 Blue to the Antenna out. The lid screws are a Phillips Posidrive #1.

Connect CAT10 Brown to vehicle Brown. NOTE: Kenwood and JVC not supported for these vehicles.

HOLDEN VT /VX Confirm the vehicle's Black/White trace is ground (factory). Connect CAT10 Brown to vehicle Brown

For Calais, Statesman, Caprice & Monaro VB, ground the vehicle Black/Yellow trace & connect CAT10

Brown to vehicle Brown

HOLDEN W/VZ Ground the vehicles Black/Yellow trace and connect CAT10 Brown to vehicle Brown.

TS ASTRA/VECTRA

HOLDEN XC BARINA Connect CAT10 Brown to vehicle Blue/Red trace (same row and next to Acc Red on ISO plug).

HOLDEN TK BARINA HOLDEN JE VIVA

Connect CAT10 Brown to vehicle White/Blue trace and vehicle White/Red trace to ground.

FORD AU1

Connect CAT10 Brown to vehicle Red/White trace. The AU1 has no (S) on the Seek button.

FORD AU2/3

Connect CAT10 Brown to vehicle Red/Black trace and CAT10 Green to vehicle Orange/Black trace.

FORD BA,

SPLICE the CAT10 Brown wire to the vehicle's Red/White

FORD TERRITORY

trace as seen in the diagram right. DO NOT CUT THE RED/WHITE TRACE as this will stop the vehicle's

overspeed function from working.

MAZDA 3/6

ECLIPSE

Connect CAT10 Brown to vehicle Brown/Yellow trace and

vehicle White/Black trace to Ground.

MITSURISH 380

Connect CAT10 Brown to vehicle Green/Orange trace and vehicle Green/Black trace to Ground.

Brown wire from

FOR FORD BA/TERRITORY ONLY

RED/WHITE Trace understeering column Solitter CAT10 MULTIPURPOSE

STEP THREE: INSTALL INFRARED OR CONNECT DIRECT

INFRARED INSTALL

It is recommended at this point to connect the infra-red plug to the CAT10 and point the LED directly at the headunit, confirming the steering wheel button commands prior to installing the cable. Once tested, install the cable and mount the LED making sure it points DRECTLY to the headunit. The LED is commonly mounted from the interior light in the middle of the roof (see diagrams on right) or from the console. Finally connect the plug to the CAT10.

DIRECT CONNECT INSTALL

If your headunit has direct connect capabilities (except for Kerwood and Eclipse), simply plug the 3.5 mm jack into the socket on the headunit.

KENWOOD Cut the 3.5mm jack off and place a single male bullet connector to the grey only wire. Connect the

Kenwood direct connect plug (Blue/Yellow Trace) to the CAT10.

Run the 2 trigger wires (Brown and Brown/Black Trace or White) from the radio harness into the CAT10 through the black grommit. Solder these two wires to the small Eclipse Direct PCB supplied and fit the

PCB onto jumper positions 1 to 5.

12 MONTHS WARRANTY

For the period of 12 MONTHS from the date of purchase of your product, we undertake to replace or repair any part of the product which fails due to manufacturing defect within 12 months of the date of purchase provided that

- You retain your receipt and this document as proof of purchase.
- b) The product serial number is not removed or altered.
 c) The product has been installed and used only in accordance with the instructions supplied with the product.
